

HCM501 – CT MODULE 10

DUE DATE: 29/03/2025 - SATURDAY

INSTRUCTIONS

1. Critical Thinking Assignment: Project Planning for Hiring Purposes in Saudi Arabia (110 points)

In this assignment, you will have the opportunity to use a project planning tool to show how you will use information and imagination to show the project components for recruiting, hiring, and training 100 new healthcare workers at a private hospital in Saudi Arabia.

Review the case study “Hospice goes Hollywood” on pages 423-425 of your textbook.

The team is at a stalemate and your task will be to help motivate the employees and plan the next moves to complete the project.

- In a paragraph or two summarize the case study situation and provide a problem statement.
- Create a Gantt chart for the project to show the timeline for implementing the needed Joint Commission accreditation.

(You can create your own chart in Excel or Word, or you can download free Gantt chart templates available at:

[Simple Gantt Chart](#)
[Gantt Project Planner](#))

- Your Gantt chart should identify at least ten required activities on the timeline that demonstrates progress over a twelve-month period towards facility accreditation.
- Additionally, the timeline should include the case study needs for recruiting, hiring, and training 100 new healthcare workers at a private hospital in Saudi Arabia.
- Include a site visit as one of the dates as well as contingency plans in case the site visit results in a provisional accreditation (meaning your organization has items that need to be addressed before full accreditation can be granted).
- In two to three paragraphs summarize how your plan supports recruiting, hiring, and training 100 new healthcare workers and how it will motivate the employees.

You are strongly encouraged to submit all assignments to the Originality Check prior to submitting them to your instructor for grading.
